VIVEK SAI PATTABANDULA

+91 6301053718 viveksaipatabandula731@gmail.com LeetCode GitHub

Summary

Software Developer with strong foundations in Data Structures, Problem Solving and full-stack development. Hands-on experience in building real-world systems including an AI-based quiz generator, chess puzzle generator .Comfortable working across Java, JavaScript, Python, and React ecosystems with end-to-end projects.

Education

B.Tech in Computer Science and Engineering 2023 – 2027
VIT-AP University *Amaravati,India*
CGPA: 8.5

Technical Skills

- **Languages:** Java, JavaScript, python
- **Frameworks:** React.js, React Native (Expo), Node.js,Express
- **Databases:** MongoDB, SQL
- **Other:** RESTapis, GIT, Docker(basic), DSA, DBMS, ML, OOPs, OS

Projects

Puzzle Drill- Chess puzzles generator LiveURL — GitHub

- Integrated the Lichess API to fetch and parse real chess games, enabling automated tactical puzzle generation.
- Developed a Java-based puzzle generation pipeline using Stockfish to evaluate game positions and extract tactical sequences.
- Built a React.js interactive chessboard with puzzle validation, side-to-move detection, hints, and sequential puzzle solving.
- Implemented a Node.js/Express REST, Docker supported backend to execute the Java puzzle generator, process generated positions, and serve puzzles to the frontend.

Bazaar- A Marketplace GitHub

- Built a full-stack platform for businesses to create profiles, showcase products, and reach customers through a centralized marketplace.
- Developed REST APIs using Node.js and Express.js for users, businesses, products, and platform interactions.
- Implemented MongoDB-based data management for business profiles, product listings, and user interactions.

TARS - AI Desktop Assistant GitHub

- Developed a Windows desktop AI assistant using Electron, React, FastAPI, and LLMs to interpret natural-language commands and automate desktop and browser tasks.
- Implemented an LLM-based command planning pipeline using Groq, structured JSON output, Pydantic validation, session tracking, and command dispatching.
- Built Windows automation tools for applications, browsers, keyboard, and mouse input, supporting multi-step workflows through natural-language commands.

Certificates

- **Full Stack MERN Certification** - Gained hands-on knowledge of full-stack web development using MongoDB, Express.js, React.js, and Node.js.
